IN THE CLAIMS

Please amend the claims by canceling claims 1-13 and 29 as shown below.

Claims 1-13 (canceled).

- 14. (Previously presented) A composition which comprises:
- a) a polymer formed from monomers comprising ethylene; CH_2 =CHQ wherein Q is C_1 - C_8 alkyl; and optionally a non-conjugated polyene; wherein
 - i) ethylene is present in an amount of from 67% to about 75% by weight;
 - ii) the polyene is present in an amount of from about 0% to about 30% by weight; and
 - iii) CH_2 =CHQ is present in an amount of from about 15% to about 40% by weight;

said polymer having a viscosity average molecular weight of from about 4,000 to about 30,000 and being a solid at room temperature, with the proviso that the sum of components i), ii) and iii) within said polymer totals 100% by weight;

b) a reinforcing agent; and

c) a high molecular weight polymer.

- 15. (Original) The composition of claim 14, wherein the non-conjugated polyene is selected from the group consisting of 5-ethylidene-2-norbornene, 1,4-hexadiene and dicyclopentadiene.
- 16. (Original) The composition of claim 15, wherein Q is methyl.
- 17. (Original) The composition of claim 16, wherein the polyene component is present in an amount of from about 1% to about 20% by weight.
- 18. (Original) The composition of claim 17, wherein the polyene component is present in an amount of from about 3% to about 15% by weight.
- 19. (Original) The composition of claim 14, wherein the CH_2 =CHQ component is present in an amount of from about 20% to about 35% by weight.

20. (Original) The composition of claim 19, wherein the CH_2 =CHQ component is present in an amount of from about 22% to about 30% by weight.

., ,

- 21. (Original) The composition of claim 14, wherein the polymer of part a) has a viscosity average molecular weight of from about 5,000 to about 10,000.
- 22. (Original) The composition of claim 14, wherein the polymer of part a) yields about 10 mm or less in a needle penetration test.
- 23. (Original) The composition of claim 14, wherein the reinforcing agent is selected from the group consisting of aramid fibers, cotton, polyesters, fiberglass, and mixtures thereof.
- 24. (Original) The composition of claim 23, wherein the reinforcing agent comprises aramid fibers.
 - 25. (Original) The composition of claim 14, wherein

the high molecular weight polymer is selected from the group consisting of natural rubber and synthetic rubber.

- 26. (Original) The composition of claim 25, wherein the synthetic rubber is selected from the group consisting of ethylene/alphaolefin/nonconjugated polyene (EPDM) rubbers, styrene/butadiene rubbers, acrylonitrile/butadiene (NBR) rubbers, polychloroprene and sulfur modified polychloroprene, and polybutadiene rubbers.
- 27. (Original) A moulded article made from the composition of claim 14.
- 28. (Original) The article of claim 27, wherein the article is selected from the group consisting of a v-belt, a timing belt, a conveyor belt, a drive belt, a hose, a seal, a diaphragm, a cable and a roll cover.
 - 29. (Canceled).

. .

30. (Previously presented) The composition of claim

14, wherein ethylene is present in an amount of from about 71% to about 75% by weight in the a) component polymer.
